

## README DBK – DBK.MA

An early CADGURUS free download. DBK draws a duct break (or continuation) between two points. The command does not use dynamic display and it uses the active symbology.

LOAD: MDL LOAD DBK

COMMAND: DBK

There are no prompts – just ID the first point and then the second point. The command will draw the line with the break.

Files:

DBK.MA – the compiled command for V8i

DBK.H – header file

DBK.MC – main source file

DBKCMD.R – command definition

DBK.MKE – make file used with the MicroStation development shell

Fdf.fdf – listing of include files (lazy way to incorporate include statements). This is NOT an Adobe file.

README DBK.PDF – this file

README DBK.docx – this file
